## Grain Auger Re-Energized

Your grain auger is a workhorse on your farm, and not just any auger will do. You need equipment that's tough, powerful and will make your job easier. Here at J.O. Harris, we choose the best products that are built to last and have the features our customers need to get the job done.

Until recently, J.O. Harris has stocked Wheatheart scissor lift grain augers and have heard great reviews from our customers, but things have started to change for this brand. For one thing, Wheatheart was adopted by a larger agricultural equipment firm whose goal is to standardize and perfect the grain handling and storage industry. This larger firm, AGI, also owns Hutchinson-Mayrath and has studied both Wheatheart's and Hutchinson-Mayrath's manufacturing processes with the end goal of elevating both the brands they carry in all categories. AGI has taken feedback from their customers on which features and product lines are best suited to the farm and have built a line of augers that reflect those improvements.

So, Hutchinson-Mayrath is now owned by the same people who manufactured Wheatheart? You bet! And they've been designing these augers to bring out the best features from each line. Hutchinson-Mayrath saw a huge change in their lineup of augers – this definitely isn't your grand-daddy's auger!

Exciting product enhancements like Abrasion Resistant (AR) Flighting, scissor lift frames, powerful remote-controlled swing hoppers, and more have re-energized the Hutchinson-Mayrath line and changed their offering for the better!

Flighting is always a pain point when it comes to maintenance. That's why Hutchinson has introduced AR Flighting in critical wear areas to improve the life of the flighting by 300%. That means your flighting will last 3X longer than it did before – saving you the trouble of replacing it and saving you the extra cost of buying new flighting. Win-win.

# Auger Re-Design

For maximum reach and reduced swaying, the improved HX now offers a scissor lift frame built with commercial strength steel. These new improvements help the auger align quickly and easily with the bin, without swaying or bowing!

We know our farmers want their augers to be turn-key, but when maintenance is needed it should be easy to do. With that in mind, Hutchinson's HX model has 6 accessible service points to the u-joints, chains, bearings, and gearboxes along with external grease zerks. These and other tool-free inspection areas will make the job of maintaining the HX easier than ever. Hutchinson has also introduced powder coat paint on the frame and continues to use corrosion resistant galvanization to help keep your HX unit looking it's best for years to come.

Although Wheatheart isn't being sold anymore, the innovations they brought to the auger industry live on through Hutchinson's HX line. AGI has been hard at work behind the scenes standardizing manufacturing and combining the best practices of each one of their brands to benefit all their lines. This means that the Hutchinson Mayrath brand is a fully reimagined unit, thanks to the innovation Wheatheart brought to the table. This also lets you know that when you see an AGI brand, you know that behind that name is decades of farming experience and tireless testing.

We're excited to bring our customers the improved HX line of swingaway augers and are taking orders now. Available in 10", 13" or 16" – in a variety of lengths and capacities ranging from up to 6,600 BPH to up to 23,000 BPH, there's sure to be a model to fit your needs.

# Parts Specials

## Salford Harrow Tines

1/2" WIRE - 20" DBL LEG SPRING TINE

**\$17.95**

## Backsaver X Swing Hopper Mover

New Backsaver X Kit, Electric Swing Hopper Mover, Fits Wheatheart 10 or 13 Inch Swing Away Augers - Will fit other augers with additional brackets call for information

**\$2250**

## Kondex Concaves

At half the width of most traditional concaves, KX7 concaves allow for greater customization of threshing configurations to specific field and crop conditions. The smaller design also allows for easier installation.

KX7 concaves have been proven effective in various crops and conditions around the world.

**\$4350**

## Tiger Shark Sections

This is the first drastically new section tooth design in decades!

Serrated Teeth Allows More Cutting Surface

Stays Sharper Longer

Cuts Faster

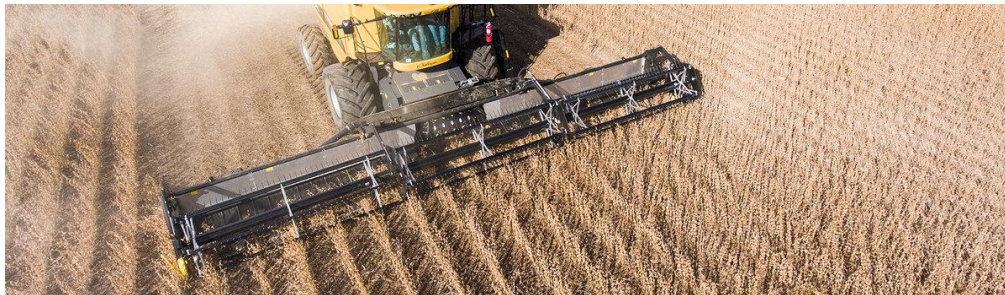

Cuts Equally Well In Soybeans, Alfalfa, Grass Hay, Wheat, Etc.

**Sold 10 Sections Per Pack \$26.51**

# New to Our Line Up

## Geringhoff TruFlex Razor Draper Head

### Frame & Body Work:

- Lightweight
- Depth Wheels for Optimum Ground Hugging

### Flip Over Reel:

- Optimum Crop Flow
- Unobstructed View of Middle of Reel

### Flexible Cutter Bar:

- Cut Nearly at Ground Level
- Superb Driveline Efficiency

### Crop Flow & Crop Feed:

- Lightweight Robust Belt
- Adjustable Belt Speed

**GERINGHOFF**  
Head of the class - no matter the crop
